

Identifying Place Value

Determine the place values for the underline numbers.

Example $\underline{5}6 = 5 \text{ tens}$.

1	$\underline{4} =$		9	$\underline{91} =$	
2	$2\underline{6} =$		10	$\underline{10} =$	
3	$9\underline{8} =$		11	$2\underline{7} =$	
4	$\underline{17} =$		12	$\underline{10}$	
5	$3\underline{1} =$		13	$\underline{99} =$	
6	$8\underline{3} =$		14	$\underline{11} =$	
7	$\underline{40} =$		15	$\underline{20} =$	
8	$\underline{21} =$		16	$\underline{29} =$
