

Addition: Problem Solving

LO: To solve problems involving addition.

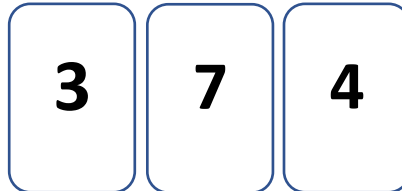

- I can understand that addition is communicative.
- I can explore abstract concepts related to addition.
- I can apply my knowledge to solve problems.

Reasoning:

Tom has 3 number cards.

He has written two numbers

sentences.

$$3 + 7 = 4$$

$$3 = 7 + 4$$

Explain what Tom has done wrong? Correct her number sentences and

Problem-Solving:

Fill the picture number sequence.

$$\bigcirc + \triangle = 6$$

$$\triangle + \bigcirc = 6$$

$$6 = \triangle + \bigcirc$$

$$4 = \bigcirc + \triangle$$

What could be the  and  the be worth?
