

## Addition: Problem Solving

LO: To solve problems involving addition.

- I can write my own addition number sentences.
- I can represent values in a variety of ways.
- I can apply my knowledge to solve problems.

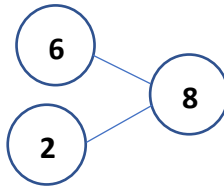

### Reasoning:

Which of the images could help to complete the number sentences?

$$\underline{\quad} + \underline{\quad} = 6$$

Fill the missing numbers:

$$\underline{\quad} + \underline{\quad} = 8$$

$$\underline{\quad} + 1 = 8$$

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

$$8 = \underline{\quad} + \underline{\quad}$$

### Problem-Solving:

Using the numbers 0-9 how many ways can you fill in the boxes to make the calculation correct? You can only use each number once in each line

<input type="text"/>	+	<input type="text"/>	=	9
----------------------	---	----------------------	---	---

How many different calculations are there?
